TECHNICAL DATA SHEET

COREBOARD ANGLE

Our coreboard angles meet Canadian steel standards established by CSSBI (Canadian Institute of Sheet Steel Building) ASTM-C645.

They are available in two standard thicknesses: .018" (.46mm) and .034" (.86mm) and are manufactured only in lengths of 10' (3657mm); see dimensions below:

Galvanizing used for the components is described in the CSSBI Technical Bulletin of February 2006, G60 (Z-180) for all thicknesses. Also available in G90 (Z-275).
