## TECHNICAL DATA SHEET

### METAL FURRING

Our metal furring meet Canadian steel standards established by CSSBI (Canadian Institute of Sheet Steel Building).

They are available in two standard thicknesses : .018" and .034" and are manufactured only in lengths of 12'; see dimensions below:

Our metal furring can be used for reinforcement or for uneven surfaces.

They can be used for interior or exterior applications.

Galvanizing used for the components is described in the CSSBI Technical Bulletin of February 2006, G60 (Z-180) for all thicknesses.
