TECHNICAL DATA SHEET

DEFLECTION CLIP

Our deflection clips as made by Trebor Building Products Ltd. meet Canadian steel standards established by CSSBI (Canadian Institute of Sheet Steel Building) ASTM-C645.

The deflection clips are available in three standard lengths: 3 1/2" (89mm), 5 7/8" (149mm) and 7 1/2" (191mm). They are offered in one standard thickness: .0713" (1,811mm); see dimensions below :

The deflection clips are used to allow a 1.5" (0.75" in each direction) deflection at the top of the wall.

Galvanizing used for the components is described in the CSSBI Technical Bulletin of February 2006, G90 (Z275).
